# Empire

## Chapter 1

*The **Right** to Conquest*

*The **Right** to seize the lands of another.  
The **Right** to subjugate a people.*

The **Right** to seize their assets. Their homes. Their lands. The **Right** to wipe out their language and culture and to replace it with the language and culture of the Empire.

The **Right** to clear the land of the native peoples so that this land is freed for colonists of the Empire. And if any oppose then the **Right** to use whatever means is necessary to crush that opposition. Including rape, holocaust, torture and imprisonment.

What gives the Empire this Right? Superiority of culture. Superiority of people. The Master Race.

If one understands this, then one understands the essence of Empire.

[\*Intro to In a Mirror Darkly\*](#)

# Golden Age

## Chapter 1

*Golden Age failed. There is nothing can be done about that now. It was blocked. That window was lost.*

That said we can still go Golden Age. It is just that our path will be longer. More difficult. But we can still achieve Golden Age. Just much, much more slowly.

In Golden Age *Freedom* is important. The *Right* of a people to be *Free*. The *Right* of a people to *Self-Determination*.

There is no place for Empire in Golden Age.

England can go Golden Age as England.

But not as Britain.
