Chapter 1

The highest level of aerospace engineering in history

That's me. Get me in as Taoiseach and I will build the most advanced fighter aircraft ever seen. Which will form the mainstay of the most advanced Air Force the world has ever seen. Not the biggest. But the most advanced. The pilots will be trained in Jedi techniques by me. Precognition. Extra-Sensory Perception. Military strategy. Genius. Superhuman reflexes. The type of pilots that only Jedi training can produce.

Chapter 2

Every one of the pilots will have Rank of Dragon

They will not be as other men and women. I will personally be overseeing their training in *Way of the Warrior*. All of them will be trained in the *Ways of the Force*.

Every single one of the pilots will also be Irish speaking. Only if Irish is the language of the Air Force would I agree to build these fighter aircraft.
