Homeopathy

Chapter 1

*The mechanism I gave in the document “Psychometry and Mystical Tracking” is the **same mechanism** by which water holds information in homeopathy and by which that information can be communicated through
Resonance*

The principle is *the same*.

If you also read my document “*The Origin of Disease – Part I*” I explain how it is the **vibrational pattern** of biochemicals in the body such as insulin, rather than their physical biochemistry, which is primarily responsible for their “active ingredient”. Their potency. Their biochemical properties.

If you understand these two principles, from “*Psychometry and Mystical Tracking*” and “*The Origin of Disease – Part I*” then you understand the mechanism behind homeopathy.
