Unification Theory

Chapter 1

Quantum Entanglement

*Ready? Then let's begin.
With Quantum Entanglement and Non-Locality.*

Non-Local means at a distance

Non-local effects mean effects at a distance.

Like psychic ability. This is an example of a *Non-Local* effect.

It is action *at a distance*.

Chapter 2

Quantum Entanglement - II

*Interconnectedness.
In the Tao all is interconnected.*

[The Force Is My Ally](#)

This is not just an analogy, nor a metaphor for Quantum Entanglement. It is more.

The Double-Slit Experiment tells us that consciousness is more primary than physical reality. Whether the electrons are particles or waves depends on consciousness. Which means that consciousness must be taken into consideration as a building block for particles. As a building block for matter. As a building block for reality.

The Double-Slit Experiment tells us this. It tells us this because consciousness affects physical reality. Consciousness is more primary than physical reality.

Where am I going with this? Consciousness is based on a ***Macroscopic Quantum Resonance Field***. People are linked together in this field by a macroscopic form of Quantum Entanglement. Which is a fancy way of saying in physics *the Tao*.

*Step-by-step I am going to show how the Tao, the Force,
is based on a Macroscopic Quantum Resonance Field of
Consciousness*

Which links all of us together in interconnectedness through a macroscopic form of Quantum Entanglement.

The ability to consciously link into this field is what makes me a Jedi.

It is what makes me the most powerful psychic in history.

How did I achieve it?

It's a woman thing.
